

WORDS FROM THE MARKET

“We use the InnoSealer on our small fruit and pepper bags. Our company is glad to have this tamper evident system as part of our food safety protocols.”

Juan Carlos Sague, Senior Manager of Packaging
Del Monte Fresh Produce

“The InnoSealer is a great product. I don’t know what you are using, but you need to use this!”

Sal Arena, Executive Pastry Chef
Sea World of Florida

“What a unique system, and perfect for our campus dining services. I know we will continue to protect our students using the InnoSeal system.”

Todd Hill, Food Service Merchandiser
University of Notre Dame

“We seal our 5 lb combination bags of grapefruit using the InnoSealer and it never misses a beat.”

Robert Martin, Packaging Merchandiser
Rio Queen Citrus Packers

“We find the InnoSeal System to be a cost effective way to provide tamper evident closure of our wrapped head lettuce.”

Joe Pezzini, VP of Operations
Ocean Mist Farms

PROTECT YOUR PRODUCT FROM A
TWISTED WORLD[®]

THE UNIQUE INNOSEAL AS SIMPLE AS IT IS BRILLIANT!

Each InnoSeal is composed of strong, non-permanent adhesive tape and paper. Tear the paper ends apart to open and to close the bag, simply place the seal on the bag and press the ends together.

EASY TO OPEN & CUSTOMER FRIENDLY

The InnoSeal uses tape and paper to create the patented closure. The concept of the Twist and Tear seal provides an easy to use closure on your products and your customers appreciate this.

TAMPER-EVIDENT BAG CLOSURE

Using the InnoSeal protects your products from unwanted hands and keeps the bags intact. Your customer can be sure they are the first one to open the bag.

VIRTUALLY AIRTIGHT & SAFE TO USE

Your bagged products will remain fresher longer and safe to use. Compared with metal bands, plastic clips and twist ties, the InnoSeal is safe when swallowed. The InnoSeal has global acceptance and is an acceptable alternative by many Safety and Government Standards.

SELF-CONTAINED

The sealer is a completely closed sealing system. This means that the seal is suitable for use in situations with extensive hygiene protocols. The sealer is constructed of ABS which makes cleaning easy.

EVERY DAY A DIFFERENT COLOR

Our seven day color coding system supports the International Food Labeling regulations. Color codes are known by your employees but not recognizable by customers.
